

Drunk Buster Goggles

Drug and Alcohol Impairment Goggles

Let the innovative Drunk Buster goggles help you create the most effective alcohol and drug awareness programs.

Using a specially crafted lens, the Drunk Buster alcohol and drug impairment goggles allow you to simulate the effects of alcohol consumption and drug impairment on your body.

Easy to use, simply slip the goggles over your head and you'll begin to experience the simulated effects of impairment.

Symptoms include reduced alertness, slowed reaction time, confusion, visual distortion, alteration of depth and distance perception, reduction of peripheral vision, double vision, and lack of muscular coordination.

The Drunk Buster goggles are now being used in over 72 different countries creating the perfect solution for drunk driving prevention, drug and alcohol awareness programs and driver education classrooms. The goggles are also used as educational tools in safety classes for boating, ATVs, snowmobile or hunting, alcohol and drug treatment programs, workplace or safety management and for occupational health personnel.

Now available in five different BAC configurations and two drug impairment goggles. Drunk Buster impairment goggles are the most affordable and the most realistic goggles on the market. All goggles include a cloth carrying bag, an instructor's guide and a full 5yr warranty.
