

## **Lifeloc Technologies Receives U.S. Department of Transportation Approval of its EASYCAL® Automatic Calibration Station for Lifeloc Evidential Breath Testers.**

*In a Drug and Alcohol Testing Industry first, the EASYCAL automated calibration station from Lifeloc Technologies will be added to the U.S. Department of Transportation "Conforming Products List of Evidential Breath Testers."*

Wheat Ridge, Colorado ([PRWEB](#)) September 15, 2014 -- Lifeloc Technologies (OTC:LCTC), a leader in the manufacture of Evidential Breath Testers for DOT and non-DOT breath alcohol testing is pleased to announce acceptance by the Department of Transportation of the new [EASYCAL](#) automatic calibration station for inclusion on the Conforming Products List (CPL) for Evidential Breath Testers (EBTs).

Lifeloc Breath Testers (including the Phoenix 6.0IR, Phoenix6.0BT and EV30) were evaluated by the Volpe Transportation Systems Center for precision and accuracy when used with the optional EASYCAL calibration station and found to conform to DOT Model Specifications for EBTs. The [EASYCAL](#) will be included as an optional accessory for Lifeloc EBTs on the Conforming Products List (CPL) for Evidential Breath Alcohol Measurement Testing Devices.

The EASYCAL improves workplace alcohol testing program compliance and reduces costs by automating common sources of error such as manual instrument calibration, calibration checks and record keeping. EASYCAL also monitors calibration gas volume, cylinder expiry date and automatically checks and sets altitude correction factors on any Lifeloc EBT. Calibration time and gas usage is reduced substantially versus manual calibration.

Amy Evans, Lifeloc Workplace Business and Training Manager remarked, "It's a great leap forward for the industry. With DOT acceptance we can begin EASYCAL shipments to our Workplace customers who fell in love with the compliance and productivity benefits of the EASYCAL at past SAPAA and DATIA conferences."

Said Mark Lary, Lifeloc Director of Regulatory Affairs, "EASYCAL does not replace Lifeloc Calibration Technician Certification (C-LOCT). Calibration Technicians will receive training on the EASYCAL station along with their manual calibration training. The Quality Assurance Plan (QAP) for each instrument has been revised accordingly and approved by the DOT."

View the [EASYCAL video](#) and get additional [product information](#) from your Lifeloc Master Trainer, the [Lifeloc Technologies website](#) or by calling 303-431-9500.

### About Lifeloc Technologies

Lifeloc Technologies (OTC:LCTC) is a trusted U.S. manufacturer of Evidential Breath Alcohol Testers and provider of drug testing products for Workplace, Law Enforcement, Corrections and International customers.
