

## LIFELOC TECHNOLOGIES RELEASES MOBILE DATA MANAGEMENT WORKPLACE ALCOHOL TESTING SOLUTION

DENVER – October 3, 2011 – Lifeloc Technologies announces the immediate availability of the Phoenix 6.0BT (Bluetooth®) DMS Kit, a new addition to its industry leading line of Workplace Breath Alcohol Testing Systems. The Data Management System (DMS) version of Lifeloc’s popular Phoenix 6.0BT breath alcohol tester adds a wireless keyboard and expanded data capture capabilities.

According to Lifeloc product manager Kelly Silverman, “The Phoenix DMS solution comes in response to user requests for additional test information to make the test printout more functional for the user. The required DOT test information can be supplemented with up to six user customizable fields that can be turned on and off as desired.”

The new Phoenix 6.0 configuration includes both a secure Bluetooth mobile printer and a new compact Bluetooth wireless keyboard for fast and easy entry of test data. Users now have the choice of entering test data directly on the Phoenix 6.0BT or via wireless keyboard. In addition to the required DOT mandated test data, the Alcohol Test Form can now include information such as company name, site location, contact information, or other data the test provider would like to include for itself or its customers.

Said Lifeloc president Barry Knott, “Innovation, ease of use, and fool-proof compliance is what we’re all about. We’ve nailed it with the Phoenix Data Management System.” The new DMS solution retains Lifeloc’s proprietary EasyMode™ DOT compliance software and the PermAffix™ tamper evident label system.
