

## **Lifeloc Technologies Announces DataTrak™ Remote Diagnostics Capability for Alcohol Testing Equipment**

*DataTrak 3.0.1 software introduces ability to receive remote diagnostic analysis on Lifeloc portable alcohol testing equipment.*

Denver, CO ([PRWeb](#)) January 8, 2008 -- Lifeloc Technologies ([www.lifeloc.com](http://www.lifeloc.com)), a pioneer in creating quality portable alcohol testing equipment for markets around the world, has released the newest version of its DataTrak software. The software is used for downloading, tracking and analyzing test results from Lifeloc alcohol testing equipment. Law enforcement officers and users in other countries find DataTrak helpful in tracking the number of tests performed by a person or in trending breath alcohol test data. In addition, the new release provides users with the unique ability to receive remote diagnostics service analysis from the factory.

Remote diagnostics is a unique service from Lifeloc Technologies. The software was designed to reduce or eliminate shipping costs and to keep equipment in use for Lifeloc portable breath test owners. Users simply connect their portable breath tester to their computer, then easily download information and send it to Lifeloc. There, a technician analyzes the data and determines if the tester requires factory adjustments or if the instrument can be remotely adjusted by a Lifeloc technician.

In addition to helping law enforcement keep testers in use, remote diagnostics is also especially helpful with the rapidly expanding use of breathalyzers in the international arena. In addition to eliminating the cost to ship portable breath testers to the US for issues, Lifeloc is also able to make some remote adjustments to equipment to optimize or customize usage.

For more information on Lifeloc DataTrak software or alcohol testing equipment, visit [www.lifeloc.com](http://www.lifeloc.com).

About Lifeloc Technologies:

For over 20 years, Denver-based alcohol testing equipment manufacturer Lifeloc Technologies ([www.lifeloc.com](http://www.lifeloc.com)) has served the business, law enforcement and corrections communities by providing high-tech alcohol testing devices. Used in over 35 countries, Lifeloc's breath alcohol testing devices are recognized for their ease-of-use, reliability and long life. Lifeloc products have been tested and approved by the National Highway Traffic Safety Administration, a part of the U.S. Department of Transportation, as well as multiple state forensic laboratories in the U.S. and in many other countries.
